The global Portable Massage Bed market size is predicted to grow from US$ million in 2025 to US$ million in 2031; it is expected to grow at a CAGR of %from 2025 to 2031.

Portable massage bed has the advantages of being foldable and easy to carry

North America is expected to be one of the most important regional markets for portable mechanic machines. The US has the largest consumer base and will continue to be the key growth driver for market players in the near future. The market in Europe is expected to witness rapid growth over the forecast period. The presence of a large number of tanning salons in countries such as Germany, France, Spain, and the United Kingdom offers good potential for the portable massage tables industry in the region. Moreover, economic growth leading to increasing disposable income of consumers is expected to have a positive impact on the European portable massage tables market in the near future. The Asia Pacific portable massage table market is expected to grow at the highest rate during the forecast period. The growth in the region can be attributed to rising investment in tourism and construction activities, resulting in an increase in the number of medical facilities and foot bath centers in cities such as Beijing, Shanghai, Guangzhou, and Shenzhen. Japan and China are the regions with major growth opportunities in the region. The Middle East & Africa market is expected to witness a higher growth rate over the forecast period. This can be attributed to rising health and fitness awareness and increasing disposable income of consumers in the Middle East region, which will lead to an increase in the number of health-related treatments, including massage therapy.
