Abstracts

The global Postpartum Belly Band market size is predicted to grow from US\$ 198 million in 2025 to US\$ 324 million in 2032; it is expected to grow at a CAGR of 7.5% from 2026 to 2032.

The postpartum belly band is a recovery aid designed for mothers to help them get back into shape faster after childbirth while providing support for the abdomen and waist.

The growth of the postpartum belly band market is mainly driven by the improvement of women's health awareness, the change of fertility concepts and the upgrading of postpartum care consumption. As more and more mothers pay attention to body recovery and body management, belly bands, as convenient and effective auxiliary tools, have gradually expanded from traditional medical rehabilitation products to daily maternal and child care. At the same time, the popularity of e-commerce platforms and the diversification of product functions have further stimulated market demand.
