The global Potable Diaphragm Expansion Vessels market size is predicted to grow from US\$ million in 2025 to US\$ million in 2031; it is expected to grow at a CAGR of %from 2025 to 2031.

Potable water expansion tanks/containers protect closed heating and hot water systems from the expansion and contraction of fluids. When water is heated, it expands and increases in volume. This water expansion can cause the system to leak and lose millions of liters of drinking water. This loss can be avoided by using an expansion vessel. Drinking water is an indispensable part of daily life, so it drives the steady growth of expansion vessels.
