Potassium bisulfite is the alternative name for potassium hydrogen sulfite. Potassium hydrogen sulfite has an extreme odor of sulfur. This can be justified since potassium hydrogen sulfite reacts with the acid of any food product and SO₂ is liberated which is helpful in killing harmful micro-organisms that are present in the food products.

Potassium hydrogen sulfite market drivers can be divided into several categories. Firstly, the demand for the product is increasing in various applications such as detergents, textiles, and paper making. The use of Potassium hydrogen sulfite as a substitute for chlorine in water treatment has also increased its demand.

Secondly, the use of Potassium hydrogen sulfite as a food additive in the production of bread and beer has also boosted its market growth. The rise in production of bread and beer has increased the demand for Potassium hydrogen sulfite.

Thirdly, the rise in the use of Potassium hydrogen sulfite in the pharmaceutical industry has also added to its market growth. It is used as a pH regulator and anti-oxidant in the production of drugs.

Lastly, the increase in environmental concerns and the need for eco-friendly products has also favored the use of Potassium hydrogen sulfite. It is a non-toxic and environmentally friendly product that can replace harmful chemicals in various applications.
