Potassium Thiosulfate Fertilizer (KTS) is a specialized liquid fertilizer known for its high concentration of potassium and sulfur, featuring 25% potassium oxide (K₂O) and 17% sulfur. This product is often referred to as 0-0-25-17s in the agricultural sector, reflecting its nutrient composition with no nitrogen or phosphorus. KTS is valued for its ability to provide essential nutrients that are crucial for plant growth, including potassium, which supports root development, water regulation, and overall plant strength, and sulfur, which enhances protein synthesis and aids in chlorophyll production. The liquid form of KTS allows for easy mixing with other fertilizers and compatibility with various application methods, such as fertigation and foliar spraying, making it a versatile choice for farmers.
