The global Potassium Water Glass market size is predicted to grow from US$ 528 million in 2025 to US$ 694 million in 2032; it is expected to grow at a CAGR of 4.0% from 2026 to 2032.

Potassium water glass, also known as industrial potassium silicate, is a colorless or slightly colored transparent viscous liquid or glassy body. It can be widely used in anti-corrosion, casting, oil fields, drilling, or high-end coatings. In anti-corrosion applications, it is mainly used as an adhesive for various anti-corrosion industries such as acid resistance, heat resistance, and wear resistance. It is formulated into acid resistant and heat-resistant materials and made into potassium water glass cement, potassium water glass mortar, and potassium water glass concrete according to different purposes. It has the advantages of high adhesion, good acid resistance, and heat resistance. As a high-temperature and heat-resistant shock resistant coating application. Potassium silicate is pollution-free, has high hardness, excellent weather resistance and high temperature resistance. By modifying it to improve its water resistance, it becomes a good high-temperature and heat-resistant adhesive. It can be used for improving acidic soil by spraying potassium silicate aqueous solution, which can significantly inhibit the absorption of heavy metals and toxic elements such as Cr and Cd. The production of potassium silicate drilling fluid is a good inhibitor with excellent anti collapse performance. Used as an adhesive in advanced welding and in glass manufacturing, it has better transparency and weather resistance.In 2024, global Potassium Water Glass production reached approximately 612 K MT, with an average global market price of around US$ 847 per MT.The dry process (calcination method) production line is the most mainstream, technologically mature, and capable method for producing all modular products. The product quality is high, but the energy consumption is also high. The annual production capacity of a single production line is usually between 10000 MT

+357 96 030922

and MT tons (referring to finished potassium silicate solution, with a concentration usually around 40%). The wet process (atmospheric dissolution method) production line has a relatively simple process, low investment, and low energy consumption, but is mainly suitable for producing low modulus (usually modulus<2.5) products with relatively high impurity content. The production capacity of a single production line has great flexibility, ranging from a few thousand tons/year to 20000 to 30000 MT/year.

Upstream: Raw materials include quartz sand, quartz powder, and potassium hydroxide.

Midstream: Potassium water glass is produced using dry (calcination method) or wet (atmospheric dissolution method) methods, and different types of products are produced by controlling the ratio (modulus) of quartz sand and potassium hydroxide. Product form: The most common form of liquid is an aqueous solution with different concentrations and moduli (M=SiO ? moles/K ? O moles), such as M=2.2, 2.5, 3.2, etc. Solid The white powder made of liquid products by spray drying and other processes is convenient for transportation and storage, and can be dissolved again when in use.

Downstream: Welding materials industry (as a binder for welding electrode coating. This is the largest and most traditional application field of potassium water glass. Its advantages are good bonding performance, stable arc, and excellent welding process performance.), refractory materials industry (as a binder, used for producing fixed refractory materials (such as refractory bricks) and amorphous refractory materials (such as refractory castables, spray coatings, and ramming materials). Potassium water glass bonded refractory materials have high fire resistance and acid resistance. ?Inorganic zinc rich coating (used as a base material (binder), mixed with zinc powder to make the coating. Coating on steel structures such as bridges, ships, and storage tanks provides excellent corrosion protection, with weather resistance and high temperature resistance (up to 400 ° C) superior to many organic coatings. ?.

United States market for Potassium Water Glass is estimated to increase from US$ million in 2025 to US$ million by 2032, at a CAGR of % from 2026 through 2032.

China market for Potassium Water Glass is estimated to increase from US$ million in 2025 to US$ million by 2032, at a CAGR of % from 2026 through 2032.

Europe market for Potassium Water Glass is estimated to increase from US$ million in 2025 to US$ million by 2032, at a CAGR of % from 2026 through 2032.

Global key Potassium Water Glass players cover MATSEN CHEMIE AG, Qemetica, Bollerup Jensen, WGT Group, PQ Corporation, etc. In terms of revenue, the global two largest companies occupied for a share nearly % in 2025.

Report Scope

LP Information, Inc. (LPI) ' newest research report, the “Potassium Water Glass Industry Forecast” looks at past sales and reviews total world Potassium Water Glass sales in 2025, providing a comprehensive analysis by region and market sector of projected Potassium Water Glass sales for 2026 through 2032. With Potassium Water Glass sales broken down by region, market sector and sub-sector, this report provides a detailed analysis in US$ millions of the world Potassium Water Glass industry.

This Insight Report provides a comprehensive analysis of the global Potassium Water Glass landscape and highlights key trends related to product segmentation, company formation, revenue, and market share, latest development, and M&A activity. This report also analyzes the strategies of leading global companies with a focus on Potassium Water Glass portfolios and capabilities, market entry strategies, market positions, and geographic footprints, to better understand these firms’ unique position in an accelerating global Potassium Water Glass market.

This Insight Report evaluates the key market trends, drivers, and affecting factors shaping the global outlook for Potassium Water Glass and breaks down the forecast by Type, by Application, geography, and market size to highlight emerging pockets of opportunity. With a transparent methodology based on hundreds of bottom-up qualitative and quantitative market inputs, this study forecast offers a highly nuanced view of the current state and future trajectory in the global Potassium Water Glass.

This report presents a comprehensive overview, market shares, and growth opportunities of Potassium Water Glass market by product type, application, key manufacturers and key regions and countries.

Key Questions Addressed in this Report

What is the 10-year outlook for the global Potassium Water Glass market?

What factors are driving Potassium Water Glass market growth, globally and by region?

Which technologies are poised for the fastest growth by market and region?

How do Potassium Water Glass market opportunities vary by end market size?

How does Potassium Water Glass break out by Type, by Application?

1 SCOPE OF THE REPORT

1.1 Market Introduction
1.2 Years Considered
1.3 Research Objectives
1.4 Market Research Methodology
1.5 Research Process and Data Source
1.6 Economic Indicators
1.7 Currency Considered
1.8 Market Estimation Caveats

2 EXECUTIVE SUMMARY

2.1 World Market Overview
  2.1.1 Global Potassium Water Glass Annual Sales 2021-2032
  2.1.2 World Current & Future Analysis for Potassium Water Glass by Geographic Region, 2021, 2025 & 2032
  2.1.3 World Current & Future Analysis for Potassium Water Glass by Country/Region, 2021, 2025 & 2032
2.2 Potassium Water Glass Segment by Type
  2.2.1 Liquid
  2.2.2 Solid
  2.2.3 Potassium Water Glass Sales by Type
    2.2.3.1 Global Potassium Water Glass Sales Market Share by Type (2021-2026)
    2.2.3.2 Global Potassium Water Glass Revenue and Market Share by Type (2021-2026)
    2.2.3.3 Global Potassium Water Glass Sale Price by Type (2021-2026)
2.3 Potassium Water Glass Segment by Application
  2.3.1 Welding Materials
  2.3.2 Refractory Material
  2.3.3 Detergent
  2.3.4 Inorganic Zinc-Rich Coating
  2.3.5 Others
  2.3.6 Potassium Water Glass Sales by Application
    2.3.6.1 Global Potassium Water Glass Sale Market Share by Application (2021-2026)
