Abstracts

The global Potato Dextrin market size is predicted to grow from US$ 18.49 million in 2025 to US$ 36.91 million in 2032; it is expected to grow at a CAGR of 10.6% from 2026 to 2032.

In 2024, global Potato Dextrin production reached approximately 4,942 tons, with an average global market price of around US$ 3,521 per ton. In 2024, the global 's total production capacity of Potato Dextrin reached 7,000 tons.

Potato dextrin is a polysaccharide produced by the partial hydrolysis of potato starch. It is typically a white, odorless powder used as a thickener, stabilizer, or excipient in food processing and pharmaceutical formulations. It belongs to the dextrin family, similar to corn dextrin and rice dextrin. While derived from different sources, it shares similar ingredients. Potato dextrin is primarily used to thicken, improve taste, or act as a diluent.The purchase price and supply of potatoes are significantly affected by climate conditions and cultivation costs, which can put pressure on production stability. The market is crowded with market participants, and in addition to potato dextrin, it also faces competition from dextrins derived from other sources, such as corn dextrin and cassava dextrin.

Potato dextrin is produced not directly from potatoes but from potato starch. Therefore, starch processing plants are directly upstream of dextrin production companies. Potatoes undergo a series of processes, including cleaning, crushing, separation, dehydration, and drying, to produce pure potato starch. The midstream industry is the core production and processing link of potato dextrin. Midstream companies are typically large starch sugar or biochemical companies. They purchase starch from upstream, perform deep processing, and produce dextrin products of various specifications, which are then sold to downstream customers in various industries. The downstream industry is the application field of potato dextrin and is very broad, mainly

including beverages, dairy products, and baked goods.

United States market for Potato Dextrin is estimated to increase from US$ million in 2025 to US$ million by 2032, at a CAGR of % from 2026 through 2032.

China market for Potato Dextrin is estimated to increase from US$ million in 2025 to US$ million by 2032, at a CAGR of % from 2026 through 2032.

Europe market for Potato Dextrin is estimated to increase from US$ million in 2025 to US$ million by 2032, at a CAGR of % from 2026 through 2032.

Global key Potato Dextrin players cover Roquette, Cargill, Potato Dextrin, LYCKEBY AMYLEX, VIMAL, etc. In terms of revenue, the global two largest companies occupied for a share nearly % in 2025.

Report Scope

LP Information, Inc. (LPI) ' newest research report, the “Potato Dextrin Industry Forecast” looks at past sales and reviews total world Potato Dextrin sales in 2025, providing a comprehensive analysis by region and market sector of projected Potato Dextrin sales for 2026 through 2032. With Potato Dextrin sales broken down by region, market sector and sub-sector, this report provides a detailed analysis in US$ millions of the world Potato Dextrin industry.

This Insight Report provides a comprehensive analysis of the global Potato Dextrin landscape and highlights key trends related to product segmentation, company formation, revenue, and market share, latest development, and M&A activity. This report also analyzes the strategies of leading global companies with a focus on Potato Dextrin portfolios and capabilities, market entry strategies, market positions, and geographic footprints, to better understand these firms’ unique position in an accelerating global Potato Dextrin market.

This Insight Report evaluates the key market trends, drivers, and affecting factors shaping the global outlook for Potato Dextrin and breaks down the forecast by Type, by Application, geography, and market size to highlight emerging pockets of opportunity. With a transparent methodology based on hundreds of bottom-up qualitative and quantitative market inputs, this study forecast offers a highly nuanced view of the current state and future trajectory in the global Potato Dextrin.
