Abstracts

The global PPT Page Turning Pen market size is predicted to grow from US\$ million in 2025 to US\$ million in 2032; it is expected to grow at a CAGR of %from 2026 to 2032.

The driving factors of PPT page turning pen may include the following aspects:

Operating system problems: If the computer's operating system does not match the PPT pen, it may cause driver failure. Some computers may not have a properly configured driver package installed, or the driver may not be installed properly due to system instability or virus. In this case, you need to reinstall the system and completely eliminate the virus. If it doesn't work, you need to replace the computer. In addition, the anti-virus software installed on the computer will also affect its normal installation, and sometimes manual confirmation is required before the installation can continue.

Poor contact when the receiver is plugged into the USB interface of the computer: If the USB is not used for a long time, it may be easily covered with dust or cause poor contact due to other reasons. In this case, the USB interface should be cleaned. The computer USB interface is located in a narrow location, which will prevent the receiver from being fully inserted into the computer. The same USB interface can be used when a USB flash drive is inserted, but the receiver inserted into the page-turning pen cannot be used. You can use the included USB data cable to connect the receiver to the computer.

Incomplete computer system files: This may result in incomplete drivers. In this case, the simplest and most direct way is to reinstall the system.

Incorrect connection password: The body and receiver of each set of PPT page-turning

pens are uniquely paired. If the receiver of the page-turning pen of the same brand is mistaken, the password may not be recognized.

There is strong electromagnetic wave interference in the surrounding environment: The audio, amplifiers, projectors and other equipment we use every day will cause a certain degree of electromagnetic interference to the receiver. If this happens, please stay away or temporarily turn it off. After the electromagnetic wave interference stops, the PPT page turning pen can work normally.
