The report requires updating with new data and is sent in 48 hours after order is placed.

According to our LPI (LP Information) latest study, the global Pram and Baby Stroller market size was valued at US\$ 2303.8 million in 2023. With growing demand in downstream market, the Pram and Baby Stroller is forecast to a readjusted size of US\$ 2566.7 million by 2030 with a CAGR of 1.6% during review period.

The research report highlights the growth potential of the global Pram and Baby Stroller market. Pram and Baby Stroller are expected to show stable growth in the future market. However, product differentiation, reducing costs, and supply chain optimization remain crucial for the widespread adoption of Pram and Baby Stroller. Market players need to invest in research and development, forge strategic partnerships, and align their offerings with evolving consumer preferences to capitalize on the immense opportunities presented by the Pram and Baby Stroller market.

A stroller is designed for infants who have begun to sit. A stroller should have safety equipment like harness and safety belts to ensure that the baby is safe sitting inside one. Besides, a stroller also comes with a hood or a canopy to protect the baby.

Strollers today come in many varieties with many different features, giving lots of options to choose. And consumers may prefer the strollers with advantages like lighter, compact, easy to store and avoid waking baby.

A stroller generally has three or four wheels for move easy. Some can folds into a significantly smaller size, which can make storage in a back of a small car trunk practical and makes storage at home simpler too.

According to World Bank statistics, the global birth rate in 2021 was about 1.7%. Although the population growth rate had slowed down, with the development of the world economy and the increase of per capita disposable income of residents, the spending power is growing. Therefore, there is still a large room for development in the baby products industry. Improving product quality and tapping the value of a single customer will become the drivers for the growth of the infant and child industry. Refinement and diversification are the core characteristics of the consumer demand. China has a large population base, and even if the population growth rate slows down, there will still be a demographic dividend. The State Council in 2022 proposes to 'Guide market players to produce safer and healthier domestic infant products'. According to the National Bureau of Statistics, China's birth rate in 2022 was 6.77%, and the birth population was 9.56 million. According to the results of the seventh national census in 2021, the number of infants and young children aged 0-6 in China reached 140 million, of which the number of infants and young children aged 3-6 exceeded 70 million. The huge population size has brewed a market demand with huge potential, and the children's consumption market has risen rapidly. Chinese families spend a lot on childcare, with the average cost of childcare ranking second in the world. The survey data released by China Research Center for Children's Industry shows that in 80% of families in China, children's expenditures account for 30% to 50% of household expenditures, and the average annual consumption of children in families is ?17,000 to 25,500. According to data from the Yuwa Population Research, the national average cost of raising a child (the cost of raising a child to the age of 18) is ?485,218. From the perspective of specific stages, the largest proportion is the cost of raising children aged 6-14, accounting for about 45%. The cost during pregnancy, the cost of childbirth and confinement, and the cost of raising babies aged 0-2 accounted for 2.06%, 2.09% and 13.33% separately.
