Pre-Crusher Garbage Compactor is an industrial waste treatment equipment that significantly reduces the volume of waste by first crushing the garbage and then compressing it efficiently. The equipment combines crushing and compression functions in one, and is particularly suitable for waste that is large in volume, low in density or difficult to compress directly, such as wooden boxes, metal barrels, large cardboard and industrial waste. Through pre-crushing, the garbage can be compressed more tightly, thereby optimizing the cost of garbage storage and transportation, while reducing the space occupied in landfills.
