The report requires updating with new data and is sent in 48 hours after order is placed.

The global Pre-fabricated Cleanroom market size is predicted to grow from US$ 407 million in 2025 to US$ 619 million in 2031; it is expected to grow at a CAGR of 7.2% from 2025 to 2031.

A modular cleanroom is often referred to as a pre-fabricated cleanroom because all the components of the cleanroom are custom manufactured in an off-site factory prior to installation. The components are shipped to a job site where they are assembled to create the modular cleanroom.

As the semiconductor and optoelectronics (wafer, LCD display manufacturing, etc.) industries continue to grow, the pharmaceutical, medical, and food industries have higher requirements for purification products and services, and the clean industry will usher in a period of rapid growth.
