Precured tread rubber is a type of rubber material that is pre-cured and designed specifically for use in the retreading of tires. The pre-cured tread rubber is typically applied to the existing tire casing after the old tread has been removed, providing a new tread surface. Precured tread rubber is a cost-effective and environmentally friendly way to extend the life of a tire. It is widely used in commercial and industrial applications, such as trucking, construction, and agriculture. By using precured tread rubber, tires can be retreaded multiple times, reducing the need for new tires and minimizing waste.
