Pregnancy tests look for a special hormone – human chorionic gonadotropin (hCG) – that only develops in a woman's body during pregnancy. These tests can use either your urine or blood to look for hCG. At-home pregnancy tests are inexpensive and commonly used urine tests.
Pregnancy test sticks and strips are common self-diagnostic tools used to determine whether a woman is pregnant or not. There are generally two types available in the market: pregnancy test sticks and test strips. Pregnancy test sticks often resemble a plastic stick with a chalk-like appearance, featuring a testing window at the tip. Users are required to place the testing window in the urine stream for a moment and then interpret the presence of colored lines or symbols to ascertain the pregnancy status. Test strips, on the other hand, are paper-like testing tools that are dipped into urine, and the result is determined based on the color changes on the strip. These tools offer a
