Premade Lentivirus: This is a lentivirus product prepared in advance for direct purchase and use by scientific researchers. These premade lentiviruses usually contain specific genes, proteins, RNA, etc., and can be used for gene transduction, gene expression, RNA interference and other experiments.

Custom Lentivirus Production Services: This is a service that generates lentivirus customized according to user needs. Researchers can provide specific genes, proteins, RNA sequences and other information to production service providers, who will then build, package and purify customized lentiviruses based on this information. This custom service provides researchers with the lentivirus they need in a specific field or for a specific experiment.
