The global Prenuptial Agreement Notary Service market size is predicted to grow from US\$ 639 million in 2025 to US\$ 967 million in 2032; it is expected to grow at a CAGR of 6.1% from 2026 to 2032.

To address the problems of insufficient legal protection, ambiguous clauses leading to disputes, difficulties in defining property rights, and high risks in subsequent enforcement of traditional prenuptial agreements, prenuptial agreement notarization services have emerged. Since the improvement of the marriage and family legal system and the professional development of the notarization system in the late 20th century, prenuptial agreement notarization services, with their legal authority, clear clauses, and enforcement guarantees, have gradually become a core support for premarital property planning in judicial practice, notary offices, law firms, and marriage registration scenarios. Currently, this service has developed into a professional system covering multiple dimensions such as customized legal clauses, notarized property lists, debt isolation design, child custody arrangements, and legal risk assessment, and is widely used in scenarios such as property protection for high-net-worth individuals, balancing the rights and interests of remarried families, legal adaptation for cross-border marriages, and asset isolation for entrepreneurial families.

As a high-frequency demand area in legal services, prenuptial agreement notarization services have benefited from policy dividends, technological empowerment, and demand upgrades, resulting in continuous market expansion. The industry needs to enhance its competitiveness through technological breakthroughs, service innovation, and regional specialization, while addressing challenges such as privacy protection and technological iteration. It should also seize investment opportunities in high-end customization, digital services, and lower-tier markets to achieve high-quality

development.
