Fermenting is an exciting and healthy way of preserving mushrooms. If done correctly, fermentation provides a way of preserving mushrooms for over 6 months.

The production and consumption of mushrooms is increasing very fast throughout the world, mainly due to greater and greater awareness of their nutritive and medicinal attributes, besides, of course, unique flavour and texture; consumption of such fancied items is also a natural corollary to the general economic development of a country and, needless to say, the world economies are booming.
