The global Press-Fit Connectors market size is predicted to grow from US\$ 8842 million in 2025 to US\$ 10590 million in 2031; it is expected to grow at a CAGR of 3.0% from 2025 to 2031.

The impact of the latest U.S. tariff measures and the corresponding policy responses from countries worldwide on market competitiveness, regional economic performance, and supply chain configurations will be comprehensively evaluated in this report.

Press-fit technology is that inserting flexible or rigid pins of connectors into plated through holes (PTHs) of printed circuit board (PCB) without soldering. It is reliable and easy to operate. The basic requirement is that the diameter of press-fit zone must be greater than the diameter of PTH. During the press-fit process, there is deformation of the pin. Thus, the pin slides into the hole and is connected with the PTH tightly.

Press Fit machines bring enhanced levels of control and force measurement that improve efficiency and yields in the manufacturing and assembly of printed circuit boards.

Global Press Fit Machines key players include TE Connectivity, Eberhard, Lazpiur, UMG Technologies, SYNEO, etc. Global top five manufacturers hold a share over 60%.

Europe is the largest market, with a share about 41%, followed by North America and China,
