Pressure decay leak tester is an air tightness leak detector that uses the 'pressure decay method'. The pressure decay test fills a pressure vessel with air until it reaches its target pressure, cuts the air source to isolate the pressure, and measures the decay (loss) of that pressure over a set period of time; a pressure loss greater than a predetermined setting indicates a leak.

The global Pressure Decay Leak Tester market size is projected to grow from US\$ million in 2024 to US\$ million in 2030; it is expected to grow at a CAGR of % from 2024 to 2030.
