The global Pressure Deep Fryers market size is predicted to grow from US\$ million in 2025 to US\$ million in 2032; it is expected to grow at a CAGR of % from 2026 to 2032.

Pressure deep fryer is a piece of unique cooking equipment that combines pressure cooking with frying. Like standard commercial deep fryers, pressure frying also involves cooking products in hot oil. However, pressure fryers have larger oil tanks and a clamshell lid. Items are sealed inside the tank, and the pressure speeds up the cooking process. Therefore, industrial pressure fryers can cook boned proteins faster and keep up with peak demands in busy foodservice facilities.
