Pressure sore prevention mattresses, also known as pressure sore prevention mattresses or pressure relief mattresses, are specialized types of mattresses designed to reduce the risk of pressure sores (also known as pressure sores or pressure sores) for people who are bedridden or unable to move. Pressure sores are caused by long-

term pressure on the skin, which can cut off blood flow and cause tissue damage. The bedsore prevention mattress is usually made of high-density foam, gel or inflatable cells, which can evenly distribute weight and reduce pressure points. Some mattresses are also equipped with adjustable air chambers or areas that can redistribute pressure to the areas of the body most likely to suffer from pressure sores. These mattresses also have a moisture absorption function that helps keep the skin dry and prevent skin breakage.
