Pressure Spray Dryer is a device that uses a high-pressure pump to atomize liquid materials into fine droplets through specially designed nozzles. These droplets are then rapidly dried in hot air or other drying media, resulting in powder or granular products. The high-pressure pump pressurizes the liquid, forming droplets through the nozzle, which come into full contact with the hot air to achieve rapid evaporation and drying. It is suitable for the production of powder or granular products in industries such as food, pharmaceuticals, and chemicals.
