The global Printed Circuit Heat Exchangers market size is predicted to grow from US\$ million in 2025 to US\$ million in 2031; it is expected to grow at a CAGR of % from 2025 to 2031.

The impact of the latest U.S. tariff measures and the corresponding policy responses from countries worldwide on market competitiveness, regional economic performance, and supply chain configurations will be comprehensively evaluated in this report.

Printed Circuit Heat Exchangers (PCHEs) are compact and efficient heat exchangers that use advanced manufacturing techniques to create intricate fluid flow passages. Unlike traditional heat exchangers with large, bulky designs, PCHEs feature a compact and modular layout that allows for high thermal efficiency and a reduced footprint.

According to our Semiconductor Research Center, the global total output value of PCB was about US\$ 81 billion in 2022. With strong drivers from new technology, such as AI, 5G and new energy vehicles, it is estimated that the PCB industry will continue to grow steadily in the next six years. Global PCB manufacturers are mainly located in China mainland, China Taiwan, Japan, South Korea, Europe and the United States. Among them, Chinese local PCB companies hold the biggest share.
