In 2017 and beyond, the demand for offset lithography machines will be the highest, compared to other product-types, in the global market. With respect to digital printing machines, offset lithography machines offer competitive advantage across multiple parameters. Firstly, the interfacial surface properties of offset lithography machines make the printing surfaces ink-absorbent and the non-printing surfaces of the machine ink-repellent. This saves additional costs on maintenance, which makes it the most economical printing machine in the global market. Furthermore, provisions for quality control and efficiency of sub-machineries such as dampening system and ink system enable high-quality, consistent printing through a lithographic process.

This report presents a comprehensive overview, market shares, and growth opportunities of Printing Machine market by product type, application, key manufacturers and key regions and countries.
