The global Printing Supplies market size is predicted to grow from US\$ 55850 million in 2025 to US\$ 68930 million in 2032; it is expected to grow at a CAGR of 3.1% from 2026 to 2032.

Printing Supplies mainly include toner cartridges, ink cartridges, etc., which are usually designed as disposable consumables.

Ink cartridges are still the mainstream in the inkjet printing market. This is mainly because mainstream brands such as HP and Canon still rely on cartridge-based inkjet printers to occupy market share advantages. In particular, there is still a huge demand for cartridge-based products in the consumer market, which continues to drive the growth of the number of cartridge-based printers.
