Private Network and Public Network Walkie-talkies refer to two different types of communication systems based on the network infrastructure they utilize:

Private Network Walkie-Talkies:

These walkie-talkies operate on a dedicated private network that is owned and controlled by the organization or entity using the communication system.

Private network walkie-talkies are commonly used in industries where secure and reliable communication is essential, such as public safety, military, utilities, manufacturing, and construction.

Organizations deploy their private network infrastructure, including base stations, repeaters, and antennas, to provide coverage over their operational areas.

The advantage of private network walkie-talkies is that they offer greater control over the communication system, including coverage, security, and prioritization of communication channels.

Public Network Walkie-Talkies:

These walkie-talkies rely on public cellular or other wireless networks for communication.

Public network walkie-talkies utilize the existing infrastructure of cellular networks to provide coverage over large geographic areas where cellular service is available.

Users typically subscribe to a service plan provided by a network operator or service provider to use public network walkie-talkies.

Public network walkie-talkies are suitable for applications where wide-area coverage is needed and where it may not be practical or cost-effective to deploy a dedicated private network infrastructure.

These systems offer the convenience of instant communication over long distances without the need for building and maintaining dedicated network infrastructure.

In summary, private network walkie-talkies operate on dedicated networks owned by the organization, providing control and security, while public network walkie-talkies utilize existing public cellular networks for communication over large geographic areas. The choice between these systems depends on factors such as coverage requirements, security needs, and cost considerations.
