Abstracts

The global Prodiamine market size is predicted to grow from US$ 68.98 million in 2025 to US$ 87.52 million in 2032; it is expected to grow at a CAGR of 3.5% from 2026 to 2032.

In 2024, global production of Prodiamine was approximately 5,500 tons, with an average selling price of about US$12,400 per ton. Single-line production capacity was approximately 500 tons per year, with an average gross profit margin of 15-25%. Prodiamine is a selective pre-emergence soil-applied herbicide, primarily used in landscaping, lawns, and nurseries. It inhibits weed growth by suppressing cell division, particularly effective against germinating grasses and some broadleaf weeds. Its mechanism of action is to interfere with spindle formation, thereby inhibiting root and shoot growth.

The upstream raw materials for Prodiamine mainly come from petrochemical and basic chemical products, including aniline, o-nitrochlorobenzene, propanol, and fuming sulfuric acid/chlorosulfonic acid, which are the core starting materials for synthesizing its technical grade. Downstream applications are directly in agriculture, where it is widely used as a selective pre-emergence herbicide in cotton, soybeans, orchards, vineyards, ornamental plant nurseries, and non-crop areas to control annual grasses and some broadleaf weeds.

United States market for Prodiamine is estimated to increase from US$ million in 2025 to US$ million by 2032, at a CAGR of % from 2026 through 2032.

China market for Prodiamine is estimated to increase from US$ million in 2025 to US$ million by 2032, at a CAGR of % from 2026 through 2032.

Europe market for Prodiamine is estimated to increase from US$ million in 2025 to US$

million by 2032, at a CAGR of % from 2026 through 2032.

Global key Prodiamine players cover Adama, FMC, Hubei Qifei Pharmaceutica and Chemical, Shaanxi Dideu Medichem, Heli Technology, etc. In terms of revenue, the global two largest companies occupied for a share nearly % in 2025.

Report Scope

LP Information, Inc. (LPI) ' newest research report, the “Prodiamine Industry Forecast” looks at past sales and reviews total world Prodiamine sales in 2025, providing a comprehensive analysis by region and market sector of projected Prodiamine sales for 2026 through 2032. With Prodiamine sales broken down by region, market sector and sub-sector, this report provides a detailed analysis in US$ millions of the world Prodiamine industry.

This Insight Report provides a comprehensive analysis of the global Prodiamine landscape and highlights key trends related to product segmentation, company formation, revenue, and market share, latest development, and M&A activity. This report also analyzes the strategies of leading global companies with a focus on Prodiamine portfolios and capabilities, market entry strategies, market positions, and geographic footprints, to better understand these firms’ unique position in an accelerating global Prodiamine market.

This Insight Report evaluates the key market trends, drivers, and affecting factors shaping the global outlook for Prodiamine and breaks down the forecast by Type, by Application, geography, and market size to highlight emerging pockets of opportunity. With a transparent methodology based on hundreds of bottom-up qualitative and quantitative market inputs, this study forecast offers a highly nuanced view of the current state and future trajectory in the global Prodiamine.

This report presents a comprehensive overview, market shares, and growth opportunities of Prodiamine market by product type, application, key manufacturers and key regions and countries.
