A professional tanning oil is a product specially designed to be applied to the skin during outdoor activities to help speed up the tanning of the skin. This product usually contains ingredients that promote melanin production, which can help the skin turn tan faster when exposed to the sun, resulting in a tan. Professional tanning oils are often applied during the summer or on vacation, and many people use them to achieve a healthy summer complexion. As concerns about skin health increase, future professional tanning oils may focus more on ingredients that are safe and less irritating to the skin.
