The global Protein Chip market size is predicted to grow from US\$ million in 2025 to US\$ million in 2031; it is expected to grow at a CAGR of %from 2025 to 2031.

The impact of the latest U.S. tariff measures and the corresponding policy responses from countries worldwide on market competitiveness, regional economic performance, and supply chain configurations will be comprehensively evaluated in this report.

Protein Chip is a technique of tracking the activities of proteins. This technique is used for monitoring the expression of the protein and determining the function of large number of protein in a single experiment. Protein chip consists of a surface such as nitrocellulose membrane, microtitre plate, glass slide, and bead. This surface helps in tracking all the activities of proteins. These Protein chips are economical, automated, rapid, highly sensitive and capable of tracking minute quantities of reagents/ sample. The application of protein chip includes antibody characterization, analysis of protein functions, proteomics, and diagnostics. Protein chips also overcome the major restraint of the conventional DNA microarray. DNA microarray was unable to monitoring the level of gene expression in proteomics.

Following a strong growth of 26.2 percent in the year 2021, WSTS revised it down to a single digit growth for the worldwide semiconductor market in 2022 with a total size of US\$580 billion, up 4.4 percent. WSTS lowered growth estimation as inflation rises and end markets seeing weaker demand, especially those exposed to consumer spending. While some major categories are still double-digit year-over-year growth in 2022, led by Analog with 20.8 percent, Sensors with 16.3 percent, and Logic with 14.5 percent growth. Memory declined with 12.6 percent year over year. In 2022, all geographical regions showed double-digit growth except Asia Pacific. The largest region, Asia Pacific, declined 2.0 percent. Sales in the Americas were US\$142.1 billion, up 17.0% year-on-year, sales in Europe were US\$53.8 billion, up 12.6% year-on-year, and sales

in Japan were US\$48.1 billion, up 10.0% year-on-year. However, sales in the largest Asia-Pacific region were US\$336.2 billion, down 2.0% year-on-year.
