The global Protein Standard market size is predicted to grow from US\$ 793 million in 2025 to US\$ 1523 million in 2032; it is expected to grow at a CAGR of 10.0% from 2026 to 2032.

Protein ladders are used in experiments to estimate the size of proteins of interest and are resolved using gel electrophoresis. They are also known as protein markers, protein standards, or protein molecular weight markers. Protein ladders contain a mixture of highly purified proteins of defined or known molecular weights. They act as a point of reference for proteins during electrophoretic transfers in western blots. They have a broad range of applications in life sciences and biochemistry labs for protein analysis, such as understanding the functional roles and mechanisms of proteins and protein discovery.

Since the 1980s, with the rapid development of science and technology, especially important breakthroughs in modern biotechnology, monoclonal antibody technology, microelectronic processors, and photochemistry, the global in vitro diagnostic industry has undergone four revolutions: biochemical, enzymatic, immunoassay, and molecular diagnosis. It has passed through its initial and early stages of growth and has formed a mature industry worth hundreds of billions of dollars. From the perspective of market size, the global in vitro diagnostic market has grown steadily in recent years. According to Kalorama information, the overall global IVD market capacity increased from \$83.3 billion in 2020 to \$117 billion in 2021. Among them, the market size of molecular diagnosis reached US \$37.04 billion, accounting for 32%, and the market size of POCT reached US \$31.59 billion, accounting for 27%. This is mainly due to the surge in demand brought by COVID-19 testing. From the perspective of regional market pattern, the global IVD demand market is mainly distributed in North America, Europe, Japan and other developed economies, accounting for more than 70% of the market share. The demand is relatively stable, and the United States is the global IVD innovation

center and the largest demand market.
