The global PTA Balloon Dilation Catheter market size is predicted to grow from US\$ 467 million in 2025 to US\$ 721 million in 2032; it is expected to grow at a CAGR of 6.5% from 2026 to 2032.

PTA balloon dilatation catheters are angioplasty devices used for minimally invasive interventional treatment of peripheral or coronary artery stenosis/occlusion. Guided by a guidewire, an uninflated balloon is delivered to the lesion site, and then pressure is applied to dilate the blood vessel and restore patency. They are widely used in the treatment of peripheral vascular diseases such as lower extremity arteries, renal arteries, and dialysis access. The upstream of its industry chain includes suppliers of core raw materials and equipment such as medical polymer materials (e.g., nylon, Pebax, PET), radiopaque markers (platinum-iridium alloy), catheter extrusion and balloon blow molding equipment, and adhesives. The midstream consists of R&D and manufacturing companies with Class III medical device registration certificates, including international giants (e.g., Medtronic, Boston Scientific, Cordis), which need to master key technologies such as multilayer composite catheter design, high-burst pressure balloon molding, and hydrophilic coatings. The downstream mainly targets hospital vascular surgery, interventional departments, and dialysis centers, entering clinical applications through distributors, centralized procurement platforms, or direct sales systems. Driven by the national promotion of domestic production of high-end medical devices and the increase in the penetration rate of peripheral interventional procedures, domestic companies with independent material processes and product layouts for specific indications are accelerating import substitution. In 2024, the global production of PTA balloon dilation catheters was approximately 818,000 units, with an average global market price of approximately US\$550 per unit. The gross profit margins of major companies in the industry ranged from 42% to 60%. Single-line production

capacity was 4 million to 8 million units per year.

United States market for PTA Balloon Dilation Catheter is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.

China market for PTA Balloon Dilation Catheter is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.

Europe market for PTA Balloon Dilation Catheter is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.
