## Abstracts

The global PTP Blister Foil market size is predicted to grow from US\$ 3375 million in 2025 to US\$ 5687 million in 2032; it is expected to grow at a CAGR of 7.8% from 2026 to 2032.

In 2025, global production of PTP blister foil reached approximately 0.42 million tons, based on an average market price of around US\$ 8,200 per ton. Industry gross profit margins generally ranged from 30% to 48%, reflecting value added from aluminum foil quality, coating technology, and pharmaceutical-grade compliance requirements. Global production capacity in 2025 was estimated at about 0.55 million tons, indicating sufficient supply capability to support expanding pharmaceutical packaging demand.

PTP blister foil is an aluminum-based packaging material used as the lidding layer in blister packs for solid oral pharmaceuticals. It provides excellent barrier performance against moisture, oxygen, and light while enabling controlled push-through access to tablets and capsules.

The industrial chain includes upstream aluminum foil, heat-seal coatings, inks, and primers. The midstream focuses on coating, printing, slitting, and quality inspection. Downstream applications mainly involve pharmaceutical blister packaging for tablets, capsules, and other unit-dose medications.

The PTP blister foil market is growing steadily as global pharmaceutical production and unit-dose packaging adoption continue to expand. Demand is driven by rising consumption of solid oral dosage forms, aging populations, and stricter requirements for drug safety and shelf-life protection. PTP blister foil remains a preferred packaging solution due to its superior barrier properties, mechanical strength, and compatibility with high-speed blister packaging lines. Technological advances in coating formulations, pinhole control, and print quality are improving performance consistency and production

efficiency. During 2026–2032, supported by pharmaceutical manufacturing growth, expansion of generic drug production, and increasing regulatory emphasis on packaging integrity, the PTP blister foil market is expected to maintain stable growth across global healthcare markets.
