The global PU Tube market size is predicted to grow from US\$ million in 2025 to US\$ million in 2032; it is expected to grow at a CAGR of %from 2026 to 2032.

PU tube is a pipe made of polyurethane material with excellent physical and chemical properties. This kind of pipeline is widely used in transportation pipelines in petrochemical, pharmaceutical, food and other fields. Its main features are flame retardant, high wear resistance, corrosion resistance, high temperature resistance, etc. PU tube are composed of three parts: inner layer, reinforcement layer and outer layer. The inner layer is generally made of polyester, polyether and other materials. The reinforcement layer is between the inner and outer layers. It is generally made of steel wire, fiber, polyester cloth or polyester thread. material, while the outer layer uses polyurethane. These properties make PU tube more and more widely used in industrial production processes.

The global PU tube market is expected to grow at an average CAGR of 5% per year over the next five years, primarily due to increasing demand for high-performance materials and technological advancements. In China, the development of PU tube is driven by the increase in population, automobile industry, building energy conservation, environmental protection requirements, and increasing market demand. The polyurethane industry is facing a new situation of slowing growth and accelerating structural adjustment. In the future, industry development will increasingly rely on innovation and improvement of technical capabilities. The 'New Industry Standardization Pilot Project Implementation Plan (2023-2035)' issued by the Ministry of Industry and Information Technology mentions the need to develop advanced polymer material standards such as advanced petrochemical and chemical materials, polyurethane materials, and study performance characterization and testing method standards. This shows that China attaches great importance to technological innovation and quality improvement of polyurethane materials. Overall, the PU tube market is showing a rapid

growth trend globally.
