Abstracts

The global Public Cold Storage Warehouse market size is predicted to grow from US\$ 139470 million in 2025 to US\$ 274860 million in 2032; it is expected to grow at a CAGR of 10.4% from 2026 to 2032.

The global food and beverage industry is growing fast, with an emphasis on convenience and ready-to-eat foods. This has led to a surge in demand for cold storage facilities to keep raw materials, ingredients and final products at prescribed temperatures to ensure food safety and extend shelf life.

It is expected that the increased consumption of perishable products and fresh produce will increase the use of cold storage, thereby increasing the market value of cold storage warehouses.

Consumers are becoming more health conscious and are increasingly looking for fresh, organic and locally sourced goods. These items usually need to be refrigerated to maintain their freshness and nutritional value. That, in turn, is driving demand for freezer warehouses.
