The global Public Safety Recording System market size is predicted to grow from US$ 372 million in 2025 to US$ 512 million in 2032; it is expected to grow at a CAGR of 4.7% from 2026 to 2032.

A Public Safety Recording System is a crucial technological infrastructure that plays a pivotal role in safeguarding communities. It encompasses a comprehensive set of tools and components designed to capture, store, and manage audio and video recordings related to public safety incidents. These systems are typically deployed in law enforcement vehicles, police stations, emergency call centers, and other key locations. For instance, in patrol cars, dash cams record traffic stops, pursuits, and other on-road encounters, providing an objective visual and auditory account that can be used for evidence in investigations, officer training, and to ensure transparency in police actions. In emergency call centers, recordings of 911 calls capture the distress calls of citizens, helping dispatchers make accurate decisions and also serving as a vital record for subsequent analysis. The stored recordings must adhere to strict legal and privacy requirements, ensuring that they are accessible only to authorized personnel and used appropriately to maintain public trust and enhance overall public safety.

In 2025, global Public Safety Recording System production reached approximately 41 K units, with an average global market price of around US$ 9,300 per unit.

Public Safety Recording System is moving from traditional voice-only logging recorders to NG911-ready, IP-based multimedia recording platforms that can capture, store, replay, and manage voice, radio, text, video, GIS/location metadata, and CAD/event data in one evidentiary workflow; the main growth drivers are NG911 migration, cloud-hosted PSAP modernization, body-worn/video integration, AI-assisted

search/transcription/incident reconstruction, and stricter audit and retention requirements, while opportunities lie in replacement of legacy analog recorders, SaaS recording, multi-agency evidence sharing, and cybersecurity-compliant storage, but challenges remain in budget constraints, integration with old dispatch/radio systems, chain-of-custody requirements, data privacy, CJIS-style security compliance, and long-term storage cost. NG911 is specifically defined as an IP-based replacement for analog 911 infrastructure, and public-safety recording vendors are positioning products around multi-channel NG911 recording and archiving.

LP Information, Inc. (LPI) ' newest research report, the “Public Safety Recording System Industry Forecast” looks at past sales and reviews total world Public Safety Recording System sales in 2025, providing a comprehensive analysis by region and market sector of projected Public Safety Recording System sales for 2026 through 2032. With Public Safety Recording System sales broken down by region, market sector and sub-sector, this report provides a detailed analysis in US$ millions of the world Public Safety Recording System industry.

This Insight Report provides a comprehensive analysis of the global Public Safety Recording System landscape and highlights key trends related to product segmentation, company formation, revenue, and market share, latest development, and M&A activity. This report also analyzes the strategies of leading global companies with a focus on Public Safety Recording System portfolios and capabilities, market entry strategies, market positions, and geographic footprints, to better understand these firms’ unique position in an accelerating global Public Safety Recording System market.

This Insight Report evaluates the key market trends, drivers, and affecting factors shaping the global outlook for Public Safety Recording System and breaks down the forecast by Type, by Application, geography, and market size to highlight emerging pockets of opportunity. With a transparent methodology based on hundreds of bottom-up qualitative and quantitative market inputs, this study forecast offers a highly nuanced view of the current state and future trajectory in the global Public Safety Recording System.

This report presents a comprehensive overview, market shares, and growth opportunities of Public Safety Recording System market by product type, application, key manufacturers and key regions and countries.

Key Questions Addressed in this Report

What is the 10-year outlook for the global Public Safety Recording System market?

What factors are driving Public Safety Recording System market growth, globally and by region?

Which technologies are poised for the fastest growth by market and region?

How do Public Safety Recording System market opportunities vary by end market size?

How does Public Safety Recording System break out by Type, by Application?

1 SCOPE OF THE REPORT

1.1 Market Introduction
1.2 Years Considered
1.3 Research Objectives
1.4 Market Research Methodology
1.5 Research Process and Data Source
1.6 Economic Indicators
1.7 Currency Considered
1.8 Market Estimation Caveats

2 EXECUTIVE SUMMARY

2.1 World Market Overview
  2.1.1 Global Public Safety Recording System Annual Sales 2021-2032
  2.1.2 World Current & Future Analysis for Public Safety Recording System by Geographic Region, 2021, 2025 & 2032
  2.1.3 World Current & Future Analysis for Public Safety Recording System by Country/Region, 2021, 2025 & 2032
2.2 Public Safety Recording System Segment by Type
  2.2.1 On-Premise Recording System
  2.2.2 Cloud-Based Recording System
  2.2.3 Hybrid Recording System
  2.2.4 Public Safety Recording System Sales by Type
    2.2.4.1 Global Public Safety Recording System Sales Market Share by Type (2021-2026)
    2.2.4.2 Global Public Safety Recording System Revenue and Market Share by Type (2021-2026)
    2.2.4.3 Global Public Safety Recording System Sale Price by Type (2021-2026)
2.3 Public Safety Recording System Segment by Recording Content
  2.3.1 Voice Logging Recording System
  2.3.2 Multimedia Recording System
