A pulse dose portable oxygen concentrator is a lightweight, battery-powered medical device that delivers oxygen to individuals with respiratory conditions, such as COPD or asthma. Unlike continuous flow concentrators, pulse dose units release oxygen in short bursts, or pulses, synchronized with the user's breathing pattern. This delivery method conserves battery life and is more efficient, as it only provides oxygen when needed. Portable and compact, pulse dose concentrators allow users to remain active and mobile while receiving the required oxygen therapy. These devices are particularly useful for travel, providing greater flexibility and independence for those with oxygen therapy needs.

United States market for Pulse Dose Portable Oxygen Concentrator is estimated to increase from US$ million in 2024 to US$ million by 2031, at a CAGR of % from 2025 through 2031.
