The pulse jet bag filter is a high-efficiency filtering dust removal equipment that uses pulse jet compressed air to clean dust and maintain good air permeability of the filter bag, thereby efficiently capturing and removing dust particles in industrial production. The equipment is mainly composed of filter bags, pulse jet systems, ash hoppers, fans and control systems, and is suitable for flue gas purification in industries such as electricity, metallurgy, cement, chemicals, and waste incineration. Compared with traditional mechanical vibration cleaning methods, the pulse jet bag filter has the advantages of high filtration efficiency, low resistance, good cleaning effect, and stable operation. It can effectively reduce dust emissions and meet environmental protection requirements.
