According to our LPI (LP Information) latest study, the global Pulse Oximetry market size was valued at US\$ 2086.3 million in 2023. With growing demand in downstream market, the Pulse Oximetry is forecast to a readjusted size of US\$ 3525 million by 2030 with a CAGR of 7.8% during review period.

The research report highlights the growth potential of the global Pulse Oximetry market. Pulse Oximetry are expected to show stable growth in the future market. However, product differentiation, reducing costs, and supply chain optimization remain crucial for the widespread adoption of Pulse Oximetry. Market players need to invest in research and development, forge strategic partnerships, and align their offerings with evolving consumer preferences to capitalize on the immense opportunities presented by the Pulse Oximetry market.

Pulse oximetry is a non-invasive method for monitoring a person's O₂ saturation. In its most common (transmissive) application mode, a sensor device is placed on a thin part of the patient's body, usually a fingertip or earlobe, or in the case of an infant, across a foot. The device passes two wavelengths of light through the body part to a photodetector. It measures the changing absorbance at each of the wavelengths, allowing it to determine the absorbances due to the pulsing arterial blood alone, excluding venous blood, skin, bone, muscle, fat, and (in most cases) nail polish.

China is the largest Pulse Oximetry market with about 28% market share. USA is follower, accounting for about 11% market share.

The key players are GE Healthcare, Philips, Smiths Medical, Nonin Medical, Medtronic, Masimo, Delta Electronics, Acare Technology, Konica Minolta, Spencer, Solaris,

Contec, Yuwell, ChoiceMMed, Heal Force, Biolight, Edan, Mindray, Jiangsu Avic, Creative Medical, Uray Medical, Wuhan Strong, Utech, Jerry Medical Instrument, General Meditech, Medzone etc. Top 3 companies occupied about 60% market share.
