The global Pulsed Dye Laser market size is predicted to grow from US\$ 2809 million in 2025 to US\$ 4480 million in 2031; it is expected to grow at a CAGR of 8.1% from 2025 to 2031.

The pulsed dye laser (PDL) refers to a type of aesthetic laser-based medical device that is developed for offering energy delivery at a variable wavelength and duration. This laser variant is usually used for treating lesions prevalent in the patient's skin, although it has been recently utilized for several other therapeutic procedures such as scars and warts, among other skin conditions.

According to the data of the International Society of Aesthetic Plastic Surgery (ISAPS), in 2021, there was approximately 12.84 million surgical and plastic treatments worldwide, an increase of 18.5% year-on-year; the number of non-surgical plastic surgery treatments was 18.6 million, a year-on-year increase of 19.9%. Among them, three countries holding the largest numbers of treatment courses are the United States, Brazil and Japan, with 7.35 million, 2.72 million and 1.75 million respectively. From the perspective of the number of plastic surgeons, the United States, Brazil and China have the largest number of doctors, accounting for 17%, 13.6% and 6.8% of the global total respectively. According to ASAPS data, the overall size of the US medical aesthetics market in 2020 was US\$9.308 billion, a year-on-year increase of 14.63%. Among them, the market share of surgical procedures was US\$6.177 billion, accounting for 66.36%; the market size of non-surgical procedures was US\$3.131 billion, accounting for 33.64%. The US medical aesthetics market is generally stable, and the proportion of the non-surgical medical aesthetics market continues to rise. Compared with mature markets such as Europe, America, Japan, and South Korea, the penetration rate of China medical aesthetics industry still has a lot of room for development. The 2021 Medical

Aesthetics Industry White Paper released by So-Young International shows that the scale of China medical aesthetics industry was estimated to reach ?184.6 billion in 2021, a year-on-year increase of 21.6%.
