According to our LPI (LP Information) latest study, the global Purifiers market size was valued at US\$ million in 2023. With growing demand in downstream market, the Purifiers is forecast to a readjusted size of US\$ million by 2030 with a CAGR of % during review period.

The research report highlights the growth potential of the global Purifiers market. Purifiers are expected to show stable growth in the future market. However, product differentiation, reducing costs, and supply chain optimization remain crucial for the widespread adoption of Purifiers. Market players need to invest in research and development, forge strategic partnerships, and align their offerings with evolving consumer preferences to capitalize on the immense opportunities presented by the Purifiers market.

Air purifiers improve the indoor climate of a room and protect the health of the people in urban environments suffering from headaches, cardiovascular diseases, and respiratory ailments. Increased allergies among people, rise in asthmatic patients, and an increasing number of tobacco smokers are driving demand for air purifiers. Air purifiers also remove smoke particles and Volatile Organic Compounds (VOC's) which pose a risk to health. Moreover, efficient air purifiers have the capacity to capture some bacteria, virus, and DNA damaging particles.

Rising pollution levels and increasing airborne diseases are expected to be the key factors driving the global air purifier market over the forecast period. Increase in disposable income across the globe, improved standard of living and increasing health consciousness are shifting the air purifier market from being a luxury product to an everyday necessity.
