Push sweepers, also known as manual sweepers or broom sweepers, are simple and lightweight cleaning tools that rely on manual human power to operate. They are commonly used for quick and convenient sweeping of small to medium-sized areas, both indoors and outdoors.

Push sweepers typically consist of a sweeping mechanism with rotating brushes or brooms that are powered by pushing the sweeper forward. As the sweeper is pushed, the brushes rotate and collect dust, dirt, and debris into a collection bin or bag located at the front or rear of the sweeper. These sweepers are easy to use and maneuver, making them ideal for cleaning areas such as sidewalks, driveways, patios, garages, warehouses, and other hard floors. They are particularly effective at picking up loose debris like leaves, gravel, and small litter.
