The quality of the greens is not the same. Generally speaking, the best greens are well maintained so that the ball rolls smoothly across the cut grass. Golfers often describe a good green as much faster, with a faster stroke that can scroll far down it. On the other hand, it takes a lot of energy to hit the ball if it rolls for a fair distance, and such a green is called slow (depending on the grass, length, and direction of growth) because the terrain of the green can be difficult to hit.
