PVC stands for the solid woven belt with PVC cover. Both top and bottom cover are PVC, the belt can be used to carry dry materials at the slope no more than 16°. The feature of the PVC conveyor belt are good fire resistant and antistatic properties, light weight, high strength, super anti-ripping and impact resistance. PVG stands for the solid woven belt with PVG cover (nitrile rubber). Both top and bottom cover are PVG, the belt can be used to carry materials mixing some water at the slope no more than 20°.

Growing Demand from Manufacturing Industries: The manufacturing sector, including industries such as mining, cement, steel, and power generation, heavily rely on conveyor systems for efficient material handling. PVC and PVG solid woven conveyor belts are known for their durability, flexibility, and resistance to abrasion, making them ideal for heavy-duty applications. The increasing demand for these belts from manufacturing industries is driving the market growth.

Infrastructure Development and Construction Projects: The construction industry plays a crucial role in the demand for conveyor belts. PVC and PVG solid woven belts are widely used in construction projects for transporting bulk materials like aggregates, sand, and concrete. As infrastructure development and construction activities continue to grow globally, the demand for solid woven conveyor belts is expected to increase.

Focus on Worker

Safety and Environmental Regulations: PVC and PVG solid woven conveyor belts are favored for their flame-resistant properties, making them suitable for applications that require compliance with safety regulations. As worker safety and environmental concerns gain prominence, industries are increasingly adopting these belts to meet safety standards and guidelines. **Technological Advancements:** Continuous research and development in conveyor belt technologies have led to the production of improved variants of PVC and PVG solid woven belts. Advancements in materials, manufacturing processes, and conveyor system designs have enhanced the performance, strength, and longevity of these belts. The availability of advanced belts with superior characteristics is driving their adoption in various industries. **Expansion of Mining Activities:** The mining industry is a major consumer of solid woven conveyor belts.
