PVC/PCTFE pharmaceutical composite rigid sheet is a high-barrier packaging material widely used in the pharmaceutical industry. PVC serves as the base layer, while PCTFE provides superior moisture resistance and mechanical durability, making the material especially suitable for high-value drugs such as solid oral formulations, lyophilized preparations, and photosensitive medicines. The upstream supply chain primarily involves PVC resins, PCTFE films, additives, and coating materials, with leading suppliers including Kureha, 3M, and Daikin, alongside regional PVC manufacturers ensuring a reliable source of raw materials.

The downstream market mainly consists of pharmaceutical companies and contract packaging providers, with key customers including multinational corporations such as Pfizer, Novartis, Roche, and Bayer, as well as regional generic drug manufacturers. These composite sheets play a vital role in protecting drug stability, ensuring safe transportation, and extending shelf life, making them an indispensable material in premium pharmaceutical packaging solutions.

In 2024, the global average price of PVC/PCTFE pharmaceutical composite rigid sheets was approximately USD 3,220 per ton, with a total annual sales volume of around 121,000 tons.
