PVDC plastic wrap films, also known as cling films or cling wrap, are widely used for packaging and preserving food items. These films are made from polyvinylidene chloride (PVDC), a synthetic polymer known for its excellent barrier properties.

PVDC plastic wrap films are designed to create a tight seal around food containers or directly over food items. They adhere well to various surfaces, helping to keep food fresh by preventing exposure to air and moisture, which can lead to spoilage. The clinginess of PVDC plastic wrap films also helps prevent leaks and spills, making them convenient for storing and transporting food.

One of the main advantages of PVDC plastic wrap films is their ability to provide a high level of protection against oxygen and other gases, as well as moisture vapor. This barrier property helps to extend the shelf life of perishable foods, such as fruits, vegetables, meats, and cheeses.
