The global Pyrotechnic Inflator market size is predicted to grow from US\$ million in 2025 to US\$ million in 2032; it is expected to grow at a CAGR of % from 2026 to 2032.

Inflators produce a quantity of gas, with a certain composition, temperature, and controlled rate. Inflators fill the airbag system to sufficiently cushion an automobile occupant in certain injury scenarios. Pyrotechnic inflators generate gas by combustion of a propellant. In case of an accident, the gas generation process is triggered by an electric signal to the initiator, subsequently igniting the propellant. Pyrotechnic inflators are widely used while providing a small size and low weight.
