The global Quadrature Boosters market size is predicted to grow from US\$ 1790 million in 2025 to US\$ 2877 million in 2032; it is expected to grow at a CAGR of 7.1% from 2026 to 2032.

In 2025, global Quadrature Booster output reached approximately 10,500 units against an installed capacity of about 14,000 units, with average unit price USD 175,000, enabling leading manufacturers to sustain gross margins around 27%. Quadrature Boosters are specialized high-voltage power transformers used in transmission networks to actively control real power flow by injecting a controllable quadrature (phase-shifted) voltage into a line, thereby redistributing load between parallel corridors, relieving congestion, improving system stability, and enabling higher utilization of existing grid assets without building new lines. The supply chain begins upstream with electrical steel laminations, copper or aluminum conductors, transformer oil or ester fluids, high-voltage insulation (pressboard, paper, epoxy systems), bushings, tap changers, power electronics for control systems, and steel tanks; these inputs are sourced from metallurgical producers, specialty chemical suppliers, and high-voltage component manufacturers. Midstream, a small group of heavy-electrical OEMs design and manufacture the core-and-coil assemblies, windings, magnetic circuits, cooling systems, and digital control units in large transformer plants, performing vacuum drying, oil filling, factory acceptance testing, and system integration. Downstream, EPC contractors and utilities handle transport (often via rail or heavy haul), site preparation, installation, commissioning, grid integration, and long-term service, with end users concentrated among transmission system operators, national grid companies, and large utilities deploying quadrature boosters in congested interties, cross-border links, and renewable-heavy corridors.

United States market for Quadrature Boosters is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.

China market for Quadrature Boosters is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.
