The global Quadruped Patrol Robot market size is predicted to grow from US\$ 157 million in 2025 to US\$ 284 million in 2032; it is expected to grow at a CAGR of 8.7% from 2026 to 2032.

In 2025, global sales of Quadruped Patrol Robot reached approximately 8 k units, with an average market price of about USD 20,000 per unit, an annual production capacity of roughly 8.5 k units, and an industry-average gross margin of approximately 35%.

A Quadruped Patrol Robot is a four-legged, bio-inspired mobile robot equipped with autonomous or semi-autonomous navigation, designed primarily for security patrol, asset inspection, and environmental monitoring. It typically combines a legged chassis with multiple joints, on-board perception (cameras, LiDAR, depth sensors) and wireless communication, enabling scheduled or on-demand patrol missions across buildings, campuses, industrial facilities and energy/chemical sites, including uneven terrain and stairs. Compared with wheeled patrol robots, quadruped platforms offer superior mobility and terrain adaptability, making them suitable for replacing or augmenting human guards in night patrols and hazardous inspections.

Upstream, the supply chain is dominated by precision actuators and harmonic gearboxes, batteries and BMS, motor drivers and robot controllers, LiDAR/3D cameras/IMUs and other sensors, plus compute platforms and AI chips, along with structural fabrication, lightweight materials and final assembly/testing. Midstream, quadruped robot OEMs handle system design, integration and software/AI development, selling under their own brands or via OEM channels. Downstream customers include security system integrators, factories and industrial parks, energy and utility operators, logistics hubs and large campuses/estates. Procurement is usually

project-based (number of robots plus deployment services), with ongoing spending on software licenses, maintenance and spare parts, so end-user consumption follows a pattern of one-off CAPEX on robots plus recurring OPEX on services as the installed base grows.

United States market for Quadruped Patrol Robot is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.

China market for Quadruped Patrol Robot is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.
