The global Quinacridone Pigments market size is predicted to grow from US\$ 522 million in 2025 to US\$ 790 million in 2032; it is expected to grow at a CAGR of 6.0% from 2026 to 2032.

Quinacridone is an organic molecule used in the formation of organic pigments. It is an organic compound with the molecular formula $C_{20}H_{12}N_2O_2$. Quinacridone pigments comprise an important class of organic pigments. Its linear form is particularly important for exploiting it commercially. Quinacridone pigments are very novel pigments that have many diverse applications. Quinacridone pigments generally produce seven types of bright and intense colors. They are preferred compared to other pigments due to its excellent bleed and resistance to heat, its deep and vibrant colors, its high transparencies and its very good tinting value and working properties among other things. In 2025, global sales of quinacridone pigments are estimated at 14,000 tons, with an average price of approximately US\$37,600 per ton.

The quinacridone pigments market is primarily driven by rising demand for high-performance organic pigments with excellent color strength, weather resistance, and chemical stability. Growth in automotive OEM and refinish coatings, industrial coatings, and high-end plastics increases the need for durable red-to-violet pigments that can withstand heat, light, and chemicals. Expanding applications in inks, especially for packaging and digital printing, further support demand due to quinacridone pigments' high chroma and transparency. In addition, tightening environmental regulations are accelerating the shift from heavy-metal-based inorganic pigments toward organic alternatives, positioning quinacridone pigments as preferred solutions in premium and compliant color systems.

From a manufacturer perspective, the core manufacturers of quinacridone pigments globally include DIC Corporation, Sudarshan (Heubach), Pigments Services (DCL), Wenzhou Jinyuan, and Hangzhou Baihehua. In 2024, the leading global manufacturers were DIC Corporation and Sudarshan (Heubach), holding approximately 53% of the market share; the second tier of manufacturers, including Pigments Services (DCL), Wenzhou Jinyuan, Hangzhou Baihehua, Zhejiang Yongquan, and Xinkai Technology, collectively held 34% of the market share.
