Abstracts

A race slalom board is a stiff snowboard with a flat, square tail and a long effective edge for good grip. A race slalom board likes perfect groomers: if there are any bumps or crud on the slope, you will get knocked around, which means it's an early morning board. GS boards often have a few mm of taper to make them handle crud a bit better. Some racers prefer narrow boards for quick edge changes, but some racers go for wider boards that allow lower stance angles and more mobility.

The global Race Slalom Snowboard market size is projected to grow from US\$ million in 2024 to US\$ million in 2030; it is expected to grow at a CAGR of %from 2024 to 2030.
