Racing brake fluid is a higher cutting fluid than other brake fluids, and it is specially designed for racing applications, where the brake system works at high temperatures. A complex blend of glycol ether borates and polyalkylene glycol ethers, together with advanced corrosion inhibitors, antioxidants and other modifiers, enables brake fluids not only to have high boiling points, but also to maintain their best-in-class viscosity, lubricity and compression performance at extreme temperatures to ensure the reliability and performance of the braking system, as well as a firm, consistent pedal.
